PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of experience building production-grade React applications, including role-based dashboards, order management systems, and data-driven UIs. Proven ability to translate Figma designs into responsive, reusable components, integrate REST APIs, and manage state with Redux and Context API. Comfortable working in cross-functional teams with backend developers, QA, and designers to ship scalable, maintainable interfaces on time.

WORK EXPERIENCE

Zyntric Tech, *Frontend Developer*

02/2024 – 02/2025 | Navi Mumbai

SMS Module – Role-Based Dashboard

- Built a multi-role dashboard (Admin, Super Admin, Team Lead, Agent) in React using Hooks and Context API to manage role-based access and workflows
- Converted Figma designs into responsive, pixel-accurate UI components using Tailwind CSS and Material UI
- Integrated 15-20 REST APIs and optimized re-renders for smoother performance across dashboard views
- Built a reusable component library (tables, modals, forms) that cut duplicate code by ~30% and sped up future feature development
- Worked closely with backend, QA, and design teams daily to keep sprints on track.

Zynone – Order Management System

- Built a scalable order management system using React, Redux, and Material UI for product listings and centralized auth/UI state
- Set up Redux for state management, removing prop drilling issues and keeping data flow consistent
- Followed clean, reusable component patterns that made debugging and maintenance easier
- Involved in regular debugging, performance tuning, and feature iterations

DBI Pvt Ltd, *Web Developer Intern*

01/2024 – 02/2024 | Navi Mumbai

- Delivered a responsive CRM frontend using HTML, CSS, and JavaScript, improving lead management UX for real estate clients.
- Implemented backend features in PHP (CodeIgniter) for role-based admin and lead-tracking modules, enabling efficient user management.
- Hosted, managed, and improved multiple client websites, resolving critical production bugs to maintain uptime.

TECHNICAL SKILLS

Frontend (React.js, Redux, Context API, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, JavaScript (ES6+)) | **Backend & DB** (Node.js, Express.js, MySQL, MongoDB) | **Tools & Testing** (Git, GitHub, VS Code, Postman, Manual Testing, API Testing, Bug Life Cycle) | **Languages** (JavaScript, Python)

PROJECTS

AI Tool for Freelancers, SaaS App - React, Node.js, Supabase, REST API

<https://gigmatefrontend.vercel.app> 

- Built a multi-feature SaaS application for freelancers using React.js, featuring an Invoice Generator with PDF export, Proposal Writer, and Bio Writer modules.
- Designed and developed a fully responsive UI with reusable component architecture using React and Tailwind CSS.
- Integrated Gemini API for AI-powered content generation (in progress), with frontend modules production-ready.
- Implemented clean navigation, dashboard layout, and modular feature structure for scalable backend integration.

E-Commerce Web App, React, Node.js, MongoDB, REST API

- Built a responsive product listing app with filtering, search, and cart functionality using React.
- Integrated an AI-based image search feature allowing users to find products by uploading a photo — improving product discovery beyond keyword search.
- Implemented API-driven data fetching with loading states, error handling, and optimistic UI updates.

AI Chatbot Interface, React, Node.js, REST API

- Built a real-time chat UI in React with streaming message handling, API integration, and dynamic conversation state management.
- Managed application state for multi-turn conversations with clean UI updates and error resilience.

EDUCATION

Dilkap Research Institute of Engineering and Management Studies, Mumbai University

2024

B.E. in Computer Engineering

CGPA: 8.15
