PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of experience building production-grade React applications, including role-based dashboards, order management systems, and data-driven UIs. Proven ability to translate Figma designs into responsive, reusable components, integrate REST APIs, and manage state with Redux and Context API. Comfortable working in cross-functional teams with backend developers, QA, and designers to ship scalable, maintainable interfaces on time.

TECHNICAL SKILLS

Frontend: React.js, Redux, Context API, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, JavaScript (ES6+)

Backend & DB: Node.js, Express.js, MySQL, MongoDB

Tools & Testing: Git, GitHub, VS Code, Postman, Manual Testing, API Testing, Bug Life Cycle

Languages: JavaScript, Python

WORK EXPERIENCE

Frontend Developer | **Zyntrix Tech**, Navi Mumbai

Feb 2024 – Feb 2025

Started as an intern, promoted to full-time within the same engagement.

SMS Module - Role-Based Dashboard

- Built a multi-role React dashboard (Admin, Super Admin, Team Lead, Agent) using React Hooks and Context API, reducing manual workflow steps and improving cross-team usability.
- Converted Figma designs into pixel-accurate, responsive components using Tailwind CSS and Material UI, cutting design-to-dev handoff time significantly.
- Integrated 20+ REST APIs and optimized component re-rendering, improving page load responsiveness across all dashboard views.
- Created a reusable component library (tables, modals, forms) following component-driven architecture, reducing duplicate code by ~30%.
- Collaborated daily with backend developers, QA, and UI/UX designers, ensuring smooth sprint delivery and clear stakeholder communication.

Zynone - Order Management System

- Built a scalable order management system using React, Redux, and Material UI, handling product listings, authentication state, and UI state centrally.
- Implemented Redux for centralized state management, eliminating prop drilling and improving data flow consistency across the application.
- Improved code maintainability by enforcing reusable component patterns and clean coding standards, reducing bug turnaround time.
- Actively Participated in debugging sessions, performance optimization, and iterative feature enhancements.

Web Developer Intern | **DBI Pvt Ltd**, Navi Mumbai

Jan 2024 – Feb 2024

- Delivered a responsive CRM frontend using HTML, CSS, and JavaScript, improving lead management UX for real estate clients.
- Implemented backend features in PHP (CodeIgniter) for role-based admin and lead-tracking modules, enabling efficient user management.
- Hosted, managed, and improved multiple client websites, resolving critical production bugs to maintain uptime.

PROJECTS

E-Commerce Web App - *React, Node.js, MongoDB, REST API*

- Built a responsive product listing app with filtering, search, and cart functionality using React.
- Integrated an AI-based image search feature allowing users to find products by uploading a photo — improving product discovery beyond keyword search.
- Implemented API-driven data fetching with loading states, error handling, and optimistic UI updates.

AI Chatbot Interface - *React, Node.js, REST API*

- Built a real-time chat UI in React with streaming message handling, API integration, and dynamic conversation state management.
- Managed application state for multi-turn conversations with clean UI updates and error resilience.

EDUCATION

B.E. in Computer Engineering

Graduated: 2024

Dilkap Research Institute of Engineering and Management Studies, Mumbai University • CGPA: 8.15

CERTIFICATIONS

- Git & GitHub for Developers - Infosys Springboard
- Web Development in React.js - Infosys Springboard
- Gen AI for Developers
- Introduction to Automation Testing
- Automation Testing using Python
