To work in a prestigious organization where I can leverage my skills, knowledge, and abilities to make meaningful contributions toward its goals. I am committed to continuous learning and professional growth, aiming to apply acquired knowledge effectively to enhance both personal and organizational success.

SKILLS

HTML | CSS | Bootstrap5 | MaterialUI | Javascript | ReactJS | JQuery | Redux | Tailwind CSS | NextJs | SCSS | SQL

PROFESSIONAL EXPERIENCE

DBI Pvt Ltd Frontend Developer

Jan 2024 – Feb 2024

- Developed a responsive front end for a CRM using HTML, CSS, JavaScript, and Bootstrap5, enhancing user experience and improving data visualization.
- Implemented backend functionalities using PHP and the CodeIgniter framework, ensuring efficient user and lead management.
- Worked on key modules including user management, super user administration, and lead tracking to streamline business operations.
- Built a responsive front end for a real estate web application using the MERN stack, enabling seamless property search and purchase functionality.
- Gained hands-on experience in website hosting, management, and maintenance, ensuring optimal performance and resolving technical issues promptly to maintain high availability and user satisfaction.

Zyntric Tech pvt Ltd Frontend Developer

Feb 2024 – Feb 2025

- Designed and developed user-friendly interfaces using React.js, enhancing user experience and improving data visualization across multiple modules, including StockCRM, SMS Module, ZynOne, and EmailDuplicator.

- Utilized Redux for state management, enhancing application scalability and reducing redundant API calls by 40%. Developed an API-driven filtration system for Excel sheets, facilitating the removal of duplicate entries and enabling admins to view and download processed data in CSV format.
- Implemented Redux for state management, optimizing API calls and enhancing application performance.
- Executed role-based authentication and access control for secure data handling and functionality management across Admin, Superadmin, Team Lead (TL), and Agent roles.
- Enhanced system efficiency by creating reusable components and optimizing code structure, improving maintainability and reducing redundancy.
- Delivered a bulk SMS sending module with data filtration, assignment, and retrieval features, integrating graphical data visualization for better insights.
- Integrated and optimized RESTful APIs, improving backend communication and reducing data retrieval latency by 35%.
- Worked closely with UI/UX designers and backend developers, streamlining workflow by 30% and accelerating project delivery by 20%.
